RING'S REMEDY

For Fever and Aque, Bilious Remittent and Intermittent Fevers, and all their kindred dis-

There was a time when Fever and Ague and Bilious Remittent Fever were considered Thor endemics-the special scourges of particular regions and localities. They seem of late Vesey John H-2 Viney Oscher years to have escaped beyond their old boundaries. They prostrate the population of old settlements as well as new; they reach the hill-top as well as sweep the marsh and the forest; they prevail in northern cities as well as on the deltas of southern rivers, and in the Wilcorten Anthony werd Possibles and

swamps of the South-west. Medical skill Wilcoxton Anthony seems to pit itself against them in vain.— Wilson Jno Wones Timothy rev They triumph over all its stereotyped drugs: Williams Saml they fasten themselves upon whole districts; Word Lewis Ward Adaline mrs they appear to become even hereditary.

they appear to become even hereditary.

But at length Science, Research, and Experiment have perfected the means of repressing, checking and exterminating these dire diseases. A preparation which has been tested during aix years of private practice, and modified from time to time during that period, until susceptible of no further improvement, is now ushered before the public under the name of Rino's Remedy, as a positive and invariable cure for Fever and Ague, Bilious Remittent Fever, and all maladies which come properly under the head of remittents and in-Remittent Fever, and an manages which come properly under the head of remittents and intermittents. The proprietor of this great medicine wishes it to be understood that he introduces it as an INFALTREE SPECIFIC, and introduces it as an invalified specific, and guaranties its uniform success. This is a bold assumption, but it is founded on the observation of years, and the equally unqualified declarations of every patient—and the aggregate amounts to some thousands—who have resorted to it. The sufferer who may try the "Remedy" will not have to wait long for a confirmation of these statements. The mirror will reflect day by day a less sallow and ghastly face, as the supply of the medicine is diminished; strength, appetite, spirits will return; the duration of the chills and subsequent heats will decrease at each recurrence,

turn; the duration of the chills and subsequent heats will decrease at each recurrence, until these symptoms cease; and before a month, and in some cases before a week is over, the convalescent will be in a condition to resume the duties of active life. "There is no such word as fail" with Rino's Ranzen. The effect is as invariable as it is salutary.

What householder, what traveler, then, can afford, if health be valuable, to be without this safeguard against a class of diseases so universally prevalent as Intermittent and Remittent Fevers. To the western pioneer and the city resident it is alike indispensable; and if taken occasionally during the warm season it will be found an admirable preventive of all endemics and epidemics produced by an impure atmosphere.
